On Demand Legal Technology™

Deliver Your Legal Services Online

web-enabled document automation

Why Deliver Legal Services Online?

The legal services market, particularly for small law firms, is entering a period of rapid change. As new, non-lawyer providers enter the Internet arena and steal market share from solos and small law firms, there is a new urgency to be more transparent, more competitive, and to reach the “connected” generation who expect online interaction with their attorneys. To survive in this competitive environment, law firms must:

- Embrace the competitive benefits of the web.
- Leverage the benefits of document automation, which translates into higher productivity and higher profit margins.
- Bundle legal advice with documents for a fixed price.
- Provide online legal advice.
- Increase client loyalty, reduce client turnover.
- Differentiate your firm from your competitors through your innovative approach to client services.
